What are 1 to 3 specific elements about the course or instructor that especially helped to support your learning?

Comments
Jeremy always provided extremely detailed and thoughtful feedback on my assignments. His grading was very careful and precise, which helped me identify subtle issues and improve my work significantly. His recitation sessions are also very well structured and highly effective: they usually begin with a clear recap of key concepts from the lecture, followed by organized summaries and comparisons of closely related ideas to strengthen understanding and memory. He then provides targeted practice problems and practical problem–solving techniques, allowing us to gain thorough practice within the limited recitation time. This structure greatly enhanced both my conceptual understanding and my problem–solving skills.
The course provides me with helpful problem–solving techniques which assists me with the understanding of class materials.
Jeremy is always asking if anyone has questions.
Jeremy provided many supplementary materials that are super helpful in understanding the course materials and improving my knowledge in extra materials.

Do you have any specific recommendations for improving this course?

Comments
None
Going over the material more slowly during some recitations would be helpful. At times I felt we were moving very fast, and I ended up copying everything down because I could not always read the handwritten notes. As a result, it was hard to focus on the material being covered.
No, I don't have.
